Encouraging the development of advanced telecommunications services in rural areas.

Declares an intent of the legislature to encourage the deployment of advanced telecommunications services in rural areas of the state, and in furtherance thereof, to provide tax exemptions and credits.

Finds that it is in the public interest of all residents of the state to ensure that advanced telecommunications services are deployed in rural areas of the state so that the rural areas of the state may serve as areas for economic development, reduce use of the public highways by encouraging telecommuting through the use of advanced services, and to benefit the environment of the state.

Reimbursing nursing homes for direct care costs.

Finds that absent changes to the nursing home case mix reimbursement system for direct care costs, unintended consequences of the system scheduled to be implemented in the 2001-2003 biennium could negatively impact the quality of care required by nursing home residents. In order to assure that unanticipated rate reductions resulting in lowered staffing levels do not occur, the legislature finds that a delay in further implementation is warranted while the legislature examines these issues and makes necessary corrections to the system.

Creates the joint legislative task force on the direct care component of the nursing home reimbursement system.

Charges the task force with reviewing the extent to which the direct care reimbursement rates relate to the level of acuity and needs of the patients served, encourage nursing home providers to staff appropriately to those demonstrated needs, and allow providers to both recruit and retain staff necessary to providing high quality patient care in a cost-effective manner.
